# CONSERVATION REPORT CARD

---

EVALUATING THE 117TH CONGRESS

**D**efenders of Wildlife is a national, nonprofit membership organization dedicated to the protection of all native animals and plants in their natural communities. Defenders' approach to conservation is direct and straightforward: We protect and restore imperiled species throughout North America by transforming policies and institutions and promoting innovative solutions. Informed by scientific, legal and policy expertise, hands-on wildlife management experience and effective advocacy, we strive to make a lasting difference for wildlife and its habitat in these uniquely challenging times.

Defenders engages in vigorous congressional advocacy efforts in support of our mission. We express our views on legislation affecting wildlife and public lands, work to achieve acceptable pro-wildlife and habitat outcomes, and grade lawmakers on their votes in our annual conservation report card.

**D**efenders of Wildlife's *2022 Conservation Report Card* measures the commitment of U.S. senators and representatives to wildlife and habitat conservation during the 117th Congress. It reviews 11 Senate votes and 10 House votes with serious implications for wildlife, habitat and the environment.

The Senate votes included confirmation of Deb Halland as Secretary of the Interior, making her the first Indigenous woman to head a presidential cabinet department. The Senate also defeated several anti-environmental measures such as bills to preserve Trump administration initiatives facilitating more wall segments along the U.S.-Mexico border, maintain an administrative rule that stripped Clean Water Act protections for thousands of waterbodies across the nation and dismantle environmental safeguards to expedite approval of oil and gas and other projects.

Pro-conservation House votes included approval of landmark investments in climate mitigation and adaptation, restoration of bison to tribal lands, a broad infrastructure package with provisions to create a national system of wildlife corridors, restore legacy roads and trails and establish a new national wildlife refuge, and a bill to protect additional wildlands.

Both chambers passed bills with historic funding to address the climate crisis and protect wildlife. Although on balance beneficial, the legislation involved a troublesome energy project permitting tradeoff that would have adversely impacted wildlife. Fortunately, the permitting measure was in separate legislation that Congress did not enact.
